

CMS-OSS Corporate Programme – Inviting Applications

Inviting applications from eligible candidates for live Corporate programme on CMS-OSS at Indore.

Introduction:

The industry's demand today is for web based applications and PHP-Linux/LAMP-OSS is the most preferred, easy, secure and cost effective platform for these solutions. However, despite the best of abilities and qualifications, there is acute shortage of developers in the industry to meet this growing demand.

In order to address the industry's needs, RiG Services propose to organise a special corporate programme and share its expertise for preparing skilled and expert professionals who can independently contribute to web application development using LAMP and Open Source.

Kindly note that this is a corporate programme and is meant only for professionals who have the experience, aptitude and inclination for improving their coding skills and contributing to application development.

About us:

RiG Services is a decade old web based business solutions provider with operations in Indore and Mumbai. The clientèle covers highly satisfied domestic and international clients. RiG Services has been providing web based business solutions using PHP-Linux and PERL since last eight years and have extensive domain expertise in open source based solutions. We have also supported various community initiatives for promotion of Open Source. For details about us, please visit www.rigservices.in.

About Content Management System and Frameworks

Every website is driven by some data presented in a certain format. The interface for feeding, processing and presenting this data is the core of a Content Management System. There are various Open Source and web based CMS available and they address the different user requirements ranging from plain static websties to e-commerce.

About RiG-CMS

RiG-CMS is developed by RiG Services based on years of expertise in content management and publishing to assist the industry in meeting the new challenges and offering quick, easy-to-deploy solutions. It is also offered as a hosted service under user licence. Some of its features include:

1. Easy setup
2. Create, update, delete search engine friendly pages and link them to categories, menus; enable comments, rating, etc. in pages.
3. Upload files, pictures, videos, etc. and link them to pages
4. Add search, scroller, poll, newsletter, and other modules seamlessly.
5. Based on Open Source and partially free for developers.

Eligibility and Contact Process:

Only IT professionals with at least two years of live experience in Web based development can apply. Must be familiar with web technologies like LAMP, ASP .NET using C# or JSP.

Interested candidates or their employers can contact us through our website or by email to training@rigindia.com with a latest copy of profile in TEXT format mentioning "CMS-Programme-2009" in the Subject line along with details of projects implemented. Companies can contact us to avail our special business offer.

Candidates who satisfy the eligibility criteria, will be required to undergo a rigorous written and personality test and interview to assess their suitability for the programme. Only short-listed candidates will be invited to join the programme. They must submit the programme fee before the due date along with confirmation of their participation in the programme. The batch size will be restricted.

Programme details:

The programme shall be conducted under direct supervision of qualified and experienced professionals who have first hand expertise in web applications and CMS programming. It is also proposed to include the development of appropriate soft skills as a pre-requisite for technical expertise.

The technical programme shall consist of following modules:

Session 1: Introduction and discussions on topics covering Internet, Web applications, Open Source, Scripting languages-PHP,AJAX-JS,SDLC,etc. Basic structure of CMS, comparison of CMS.
