

PHP-OSS Training 2010 – Inviting Applications

Inviting applications for live training programme on PHP-Linux/OSS at Indore.

Internship combined with real time exposure with industry experts.

🏠 About PHP-Linux 🏠

The industry's demand today is for web based applications and PHP-Linux/LAMP-OSS is the most preferred, easy, secure and cost effective platform for these solutions. However, despite the best of abilities and qualifications, there is acute shortage of developers in the industry to meet this growing demand.

In order to address our in-house and industry's needs, RiG Services propose to organise a special training programme and share its expertise for preparing skilled and expert professionals who can independently handle projects using LAMP and Open Source.

🏠 About us 🏠

RiG Services is a decade old web based business solutions provider with operations in Indore, M.P. and Mumbai. The clientele covers highly satisfied domestic and international clients. RiG Services has been providing web based business solutions using PHP-Linux and PERL since last eight years and have extensive domain expertise in open source based solutions. We have also supported various community initiatives for promotion of Open Source. For details about us, please visit www.rigservices.in.

The Training Programme is very restrictive in nature and is focussed on quality over quantity. Generally, we conduct only one programme per year and ensure that the chosen professionals are suitably placed in their career.

🏠 Eligibility and Contact Process 🏠

- Only MCA/MSc[CS/IT]/MTech/PGDCA Final Year students from AICTE recognised institutes, expecting to complete their degree/course in July 2010/11 can apply.
- Additional exposure to web technologies like ASP .NET using C# or JSP would be a plus.
- Interested candidates can request for registration through our website <http://training.rigindia.com> or by email to **training [at] rigindia.com** with a latest copy of your CV in TEXT format mentioning "PHP-OSS Programme-2010" in the Subject line along with educational background and IT exposure.
- Candidates who satisfy the eligibility criteria, will be required to undergo a rigorous written and personality test and interview to assess their suitability for the programme.
- Only short-listed candidates will be invited to join the programme. They must submit the full programme fee before the due date along with confirmation of their participation in the programme.

🏠 Programme details 🏠

- This is not the conventional classroom oriented coaching programme and is meant only for professionals who have the aptitude and inclination for improving their coding skills in real work environment.
- The batch size will be restricted strictly to single digit only [proposed to max. of six person only].
- The programme shall be conducted under direct supervision of qualified and experienced professionals.
- It is also proposed to include the development of appropriate soft skills as a pre-requisite for technical expertise.

The technical programme shall consist of following technical modules:

- Introduction to Internet, Web applications, Open Source, Scripting languages, etc.
- Hacker attitude: soft skills like communication, reading, patience, logical thinking.
- Forms and basics of HTML.
- PHP-Apache, application of functions, creating dynamic interfaces.
- Database design using MySql and its operation using scripts.
- Any other aspects that may be required.
- Project implementation using PHP.
- Report submission and seminar.
